"Locations of future pump stations, major interceptors, and trunk sewers are being provided for general information only and will not serve as the basis for any future consistency determinations or permit reviews unless the pump station, major interceptor or trunk sewer is part of a State or Federally funded project."

"Pursuant to N.J.A.C. 7:15, Riparian zones are 300 feet from top of bank (or centerline of a first order stream where no bank is apparent) for waters designated as Category One and all upstream tributaries within the same PDES. 150 feet for waters designated Trout Production and all upstream waters; 150 feet for water designated Trout Maintenance and all upstream waters; 150 feet for waters designated Trout Production and all upstream waters; 150 feet for any segment of water flowing through an area that contains documented habitat for threatened or endangered species or plants or animals which is critical to the survival, and reproduction of such species or plants or animals; 150 feet for waters that run through and/or produce fish, and 50 feet for all waters not designated as C1, trout waters, critical water dependent (Threatened and/or Endangered Species) habitat or associated with wetlands."

"Development in areas mapped as wetlands, flood prone areas, suitable habitat for endangered and threatened species as identified on the Department's Landscape Maps of Habitat for Endangered, Threatened and Other Priority Wildlife as Rank 3, 4, and 5, Natural Heritage Priority Sites, riparian zones, steep slopes, or designated river areas may be subject to special regulation under Federal or State statutes or rules, and interested persons should check with the Department for the latest information. Depiction of environmental features shall be for general information purposes only, and shall not be construed to define the legal geographic jurisdiction of such statutes or rules."

"Areas located within the watershed of a Freshwater One (FWO) stream, as classified in the Surface Water Quality Standards, and/or that have Class 1-A ground water (Ground Water of Special Ecological Significance), as classified in the Ground Water Quality Standards, are identified as "Non-degradation water areas based on the Surface Water Quality Standards at N.J.A.C. 7:15B, and/or the Ground Water Quality Standards at N.J.A.C. 7:15C." Where this requirement has been studied and reviewed as part of the WMP permit review process, the Department under the Ready Improvement Sewerage and Facilities Act (NJSA 18:11-23) or individual Treatment Works Approval or New Jersey Pollutant Discharge Elimination System Permits (under NJAC 7:14A). It also applies to RSDS which require only local approval. Compliance with the correction requirement has been demonstrated through adoption of municipal and/or sewerage authority ordinances. See municipal chapters for additional information."

"Development in areas mapped as wetlands, flood prone areas, suitable habitat for endangered and threatened species as identified on the Department's Landscape Maps of Habitat for Endangered, Threatened and Other Priority Wildlife as Rank 3, 4, and 5, Natural Heritage Priority Sites, riparian zones, steep slopes, or designated river areas may be subject to special regulation under Federal or State statutes or rules, and interested persons should check with the Department for the latest information. Depiction of environmental features shall be for general information purposes only, and shall not be construed to define the legal geographic jurisdiction of such statutes or rules."

"Proposed developments lying into existing and proposed sewer service areas which require coastal permits must demonstrate compliance with all applicable sections of the Coastal
